

# KLEENRITE CHEMICAL

*Faster Cleaning • Better Performance • Safer Solutions®*

Browning Treatment is a unique formula that provides exceptional results on tannin-type stains, such as cellulosic browning and yellowing, urine, fruit juice, beer and plant soil. This product does not require rinsing after application, and will not leave soil-attracting residue.

## DILUTIONS

Do not dilute. This product is ready-to-use.

## DIRECTIONS

- 1) Shake gently before use.
- 2) Always test for color stability before use.
- 3) Spray onto carpet or fabric until slightly damp. For best results, agitate carpet with a carpet rake or gently work into fabric with a clean white towel. For severe carpet browning, apply using a spin pad/bonnet method (immersion or spray method).
- 4) Allow to air dry; do not accelerate drying time.
- 5) For whitening area rug fringes or to remove coffee or tea stains, use Kleenrite CaféAway™.

Note: In cases of over-application, extract with Kleenrite KleenRinse® Acidic.

## TECHNICAL DATA

pH at use dilution .....	3.85
Compound type .....	nonionic
Water solubility .....	complete
Freeze/thaw stable .....	yes
VOC compliant .....	yes
Shelf-life, years .....	5

# Browning Treatment

[ removes cellulosic browning & yellowing ]

## AVAILABLE SIZES

US gallon . 55-gallon drum

## ADVANTAGES AND USAGES
